ACKNOWLEDGEMENTS

Acknowledgement of Country

The Western Australian Health Translation Network (WAHTN) and Consumer and Community Involvement Program (CCIProgram) acknowledges the Aboriginal people of the many traditional lands and language groups of Australia. We acknowledge the wisdom of Aboriginal Elders both past and present and pay respect to Aboriginal communities of today.

Acknowledgement of Lived Experience

We acknowledge the importance and expertise of the lived experience voice of health consumers and carers. We recognise their involvement in making a difference in supporting health research and impacting the health and wellbeing of our communities.

Other Acknowledgements

We would like to express our sincerest gratitude to all the consumers and community members who were involved in the Nutrition & Health Innovation Research Innovation Institute (NHIRI) Priority Mapping project; your time, energy and contributions are all greatly appreciated.

Lastly, we would like to thank the team from NHIRI along with the team from the WAHTN CCIProgram for their diligent work in planning, promoting and successfully facilitating the Research Priority Mapping Workshop (the Workshop).

INTRODUCTION

Consumer and Community Involvement Program

The Consumer and Community Involvement Program (CCIPProgram) is an enabling platform of the Western Australian Health Translation Network (WAHTN). The CCIPProgram actively supports partner universities, health and medical research institutes, health service providers and non-Government organisations to bring together consumers and people with lived experience and connect them with health and medical researchers. The success of the CCIPProgram comes through building and maintaining strong relationships with WAHTN and Partner Organisations.

Consumers and community members are an integral part of the research process, allowing for greater transparency, openness and accountability leading to research which is more relevant and impactful to the community. Our aim is for consumer and community involvement to be standard practice in all health research in Western Australia. As such, our services, resources and training programs have been developed to support consumers and community members being involved at all stages of the research cycle.

CCIPProgram Team:

Deb Langridge, Head
Ingrid Laing, Coordinator
Kerry Mace, Coordinator
Jillian Northwood, Coordinator
Kat Stewart, Coordinator
Briony Abraham, Event Officer

Nutrition & Health Innovation Research Institute (NHIRI) at Edith Cowan University

The Nutrition & Health Innovation Research Institute (the Institute) is committed to reducing the burden of cardiovascular and other chronic diseases through nutrition research excellence, while supporting the next generation of research leaders in the field. Their research advances evidence for nutritional approaches to improve health across the lifespan and develops innovative technologies for translation and health promotion.

The Institute is comprised of scientific and medical researchers who investigate how diet can improve health and how this knowledge can be translated into practice and policy. Their research is relevant to all life stages - from pregnancy and early infant feeding to aged care. Outcomes provide the tools and knowledge to inform decisions regarding nutritional approaches to improve health across the lifespan.

In January 2023, the Institute formally commenced a 3-year partnership with the CCIP Program with the aim to embed consumer and community involvement across the entire program of work at NHIRI. One of the major activities planned for Year 1 of the implementation project was to run a Research Priority Mapping Workshop (the Workshop). The purpose of the Workshop was to directly collect future research projects and initiatives as informed by the wider community and prioritised within a lived experience lens.

NHIRI Researcher Leads:

Dr Mary Kennedy -- Post Doctoral Research Fellow

A/Prof Joshua Lewis -- Associate Professor

Prof Jonathan Hodgson -- Director

STRUCTURE & PROCESS

The Workshop was run in two separate phases, with Phase 1 consisting of a Pre-Workshop Survey, and Phase 2 being the in-person, full-day Research Priority Mapping event (Figure 1).

Figure 1: Overview of event process.

PHASE 1

Pre-Workshop Survey

A Survey Monkey was developed by both the CCIP Program and the NHIRI staff and disseminated on 23 May 2023. The survey collected thoughts and ideas from people with lived experience relating to research priorities around nutrition and heart health. The survey remained open for 6 weeks, closing 3 July 2023.

The Survey can be found in Appendix 1. The following demographic information was collected as part of the Survey:

- Age
- Gender identity
- Aboriginal or Torres Strait Islander origin
- Country of Birth
- Preferred spoken language
- Postcode
- Lived Experience (someone who has been diagnosed by a health-care provider with one or more of the following conditions):
 - High blood pressure (hypertension)
 - High cholesterol
 - Heart disease
 - Stroke
 - Type 2 diabetes/pre-diabetes
 - Cardiovascular disease
 - Other

The focus question was then posed to survey participants, seeking feedback around research priorities, and outlining next steps, as shown below (Figure 2).

NHIRI Priorities Workshop Survey
NHIRI project focus question

* What are the three most important areas/topics you think should be researched to better understand how diet and lifestyle could impact/improve heart health in the community?

Area 1:

Area 2:

Area 3:

Your responses will be collated into a list of priorities collected from individuals with lived experience and carers across Western Australia. At this point, we will invite a select number of people to attend an all-day workshop where we will refine the priorities of all survey responses and refine to a top 10 list. These top 10 items will be further refined to ensure the research priorities are refined, representative and informed by people living with or caring for people heart health related conditions.

If you'd like to express your interest in attending the all-day Priorities Workshop held 19 July 2023 at ECU in Joondalup, please provide your details below. Given attendance to the Priorities Workshop is limited, we are unable to offer a place to all who express interest in attending. The CCIPProgram will be in touch closer to the date of the event to confirm attendance, and/or indicate position on waitlist.

Figure 2: Excerpt from pre-workshop survey.

The survey was distributed via several stakeholders:

- NHIRI networks and partnerships
- CCIPProgram membership
- Relevant social media platforms

A total of two-hundred and sixty-one ideas and thoughts were submitted from eighty-seven consumers/carers with a lived experience of one or more identified heart health condition/s. The responses collected from survey participants were collated and condensed by the CCIPProgram Team and NHIRI staff, totalling Twenty-two key priorities. These themes were used as the platform for Phase 2 of the Workshop.

PHASE 2

Research Priority Mapping Workshop

The full day in-person workshop was delivered on 19 July 2023 at Edith Cowan University (ECU) in Joondalup, Western Australia. In attendance were 11 individuals/carers with a lived experience of an identified heart health condition who completed the Pre-Workshop Survey. Additionally in attendance were 7 staff members from the Institute, along with the full team from the CCIP Program. The Head of the CCIP Program, Deb Langridge delivered the Research Priority Mapping Workshop, with the support of ECU CCI Coordinator, Jillian Northwood.

3.00 pm	Thank you & close	Deb

SESSION 1: BACKGROUND

The first session of the Workshop provided an overview of Phase 1 and the process involved in collating the two-hundred and sixty-one priorities from survey responses and condensing to the twenty-two key priorities. It was explained that the twenty-two key themes are inclusive of ALL two-hundred and sixty-one responses obtained from the survey and summarise and reflect the entirety of consumers' indicated priorities.

Demographics of Survey Respondents

An overview of Phase 2 was given to all attendees, discussing objectives for the remainder of the in-person event. The Institute was invited to provide background information and context regarding the importance of the event and what next steps look like following the findings from today's workshop. Ultimately, by the end of the Workshop, the consumers in attendance had utilised the twenty-two identified common themes based on their survey results to inform and rank the top-10 key research priorities for the Institute.

SESSION 2: DISCUSS AND FINALISE KEY PRIORITIES

This session allowed attendees their first glance of the Twenty-two key themes as condensed and collated by the CCIP Program and NHIRI researchers. The Twenty-two key themes, shown below, were presented to the attendees with the directive that they work together to review themes and ensure that the lived experience voice and perspective is properly captured. Attendees were asked to indicate whether any of the themes presented required any further clarification.

Diet	Microbiome	Access to services/commu nity programs	Exercise & physical activity
Genetics	Prevention	Nutritional Guidance	Medication
Access to information & resources	Nutrition Research	Social & Political Factors	Lifestyle
Early identification	Specific illnesses & comorbidities	Mental health	Hormone
Health messaging	Social & emotional connection	Weight management & body composition	Seniors
	Stress management & nervous system	Motivation & behavioural factors	

SESSION 2: DISCUSS AND FINALISE KEY PRIORITIES

This session in the Workshop was the first opportunity attendees engaged and talked about each of the key themes in table groups. Each table was tasked with discussing the following questions to see if any options could be edited, combined, OR if anything additional should be considered:

- What do you think about the identified key themes?
- Are you in agreement?
- Can you identify any areas that may be missing?
- Are there any themes that can be combined?
- Are you happy with the wording utilised to capture each theme?

SESSION 3: PRESENTATION AND DISCUSSION OF REVISED THEMES

Feedback from the tables was condensed and presented to the greater group. The following revised themes were identified and agreed upon by the consumers in attendance.

- Exercise & physical activity
- Individual physiology
- Lifestyle
- Medication
- Social/political factors & access
- Ecological approach
- Education
- Mental health & connection + spirituality
- Nutrition and nourishment

SESSION 4 AND 5: RANK & PRESENT TOP KEY PRIORITIES

Table groups were asked to discuss and rate priorities with respect to the most important through less important research priority. Following in depth discussions, debate, and sharing of lived experiences, the final list of priorities was determined using a dotmocracy process whereby consumers ranked the final 9 key themes into the following research priorities for Institute.

- 1 Individual physiology
- 2 Nutrition & nourishment
- 3 Education
- 4 Connection & spirituality + mental health
- 5 Social/political factors & access
- 6 Ecological approach
- 7 Lifestyle
- 8 Exercise & physical activity
- 9 Medication

Of note, two common themes were consistently discussed amongst all of the finalised priorities. The themes recurring within the final priorities were **Seniors** and **Hormones**. The group concluded these two topics need to be specifically researched further in relation to the final research priorities.

Many additional thoughts relating to the final research priorities were shared throughout the Workshop. These thoughts, concepts, and suggestions were captured and presented in the table below.

Table 1: Summary of additional considerations posed by attendees during discussions around final research priorities.

Priority	Additional Considerations
Individual physiology	<ul style="list-style-type: none"> • Specific illness/comorbidities • Genetics • Hormones • Weight management/body composition
Nutrition & nourishment	<ul style="list-style-type: none"> • Nutritional guidance • Diet • Nutrition research • Microbiome
Education	<ul style="list-style-type: none"> • Health messaging & communication • Access to information & resources • Early identification • Access to services & community programs <ul style="list-style-type: none"> ◦ Support ◦ Implementation • Prevention • Advocacy • Who is the target audience? <ul style="list-style-type: none"> ◦ General Practitioners ◦ Health Service Providers ◦ Consumers ◦ Carers • Awareness raising
Connection & Spirituality + Mental Health	<ul style="list-style-type: none"> • Motivation and behavioural factors • Stress management & nervous system • Social & emotional connection wellbeing

Priority	Additional Considerations
Social/political factors & access	<ul style="list-style-type: none"> • Access for unhoused population • Considerations for CaLD population • Rural and remote population • Services for financially impacted populations • Services and access for Aboriginal and Torres Strait Islander peoples • Affordability of services, exercise programs, and food • Policy • Inclusion of naturopath and allied health services
Ecological approach	<ul style="list-style-type: none"> • Layers of system • All-encompassing • Integrative nutrition <ul style="list-style-type: none"> ◦ Integrative approaches to improve diet + lifestyle
Lifestyle	<ul style="list-style-type: none"> • Work + Life + Health + Family balance
Exercise & physical activity	<ul style="list-style-type: none"> • Formal rehab programs • Self-managed programs
Medication	<ul style="list-style-type: none"> • Supplements • Side-effects of medication • Polypharmacy

NEXT STEPS FOR CONSUMER INVOLVEMENT AT THE INSTITUTE

Many attendees expressed an interest to remain in contact with the Institute with indications for further involvement. All attendees will receive this Summary Report of the Workshop and updates on future involvement opportunities through the Institute.

Following the success of the Research Priority Mapping Workshop, researcher Dr Mary Kennedy of NHIRI, was awarded one of three remaining Community Conversations through Edith Cowan University's partnership with the CCIPProgram. The securement of one of the highly sought-after Community Conversation will allow Dr Kennedy and fellow NHIRI researchers an opportunity to dive deeper into a specific research priority as informed by the consumers involved in the Research Priority Mapping Workshop.

The CCIPProgram looks forward to continuing our support of the Institute and thank the Team members who were part of an amazing day at the Workshop.
